Dengue Cases

It is important to note that the day-to-day numbers fluctuate, as they depend on the number of cases notified each day. Therefore, weekly numbers are a better reflection of actual trends.

Number of Reported Cases

02-Nov	03-Nov	04-Nov	05-Nov	06-Nov	07-Nov	08-Nov at 3pm
33	26	56	57	50	61	17

Number of Reported Cases by E-week (from Sun 0000hrs to Sat 2359hrs)

E-week 39 (22-28Sep19)	E-week 40 (29Sep-05Oct19)	E-week 41 (06-12Oct19)	E-week 42 (13-19Oct19)	E-week 43 (20-26Oct19)	E-week 44 (27Oct-02Nov19)	E-week 45 (03-08Nov19 at 3pm)
261	246	228	239	242	309	267

Cumulative No. of cases for 2019 (First 44 E-weeks): 13629
--

Compiled by Communicable Diseases Division, Ministry of Health

A total of 13,629 dengue cases have been reported this year (as of 2 November 2019). 309 cases were reported in E-week 44, an increase of 67 cases over the 242 cases reported in the previous E-week. The number of dengue cases has been increasing over the past three weeks. In addition, the Gravitraps deployed by NEA at HDB residential estates have detected an increase the adult *Aedes aegypti* mosquito population. Taken together, these are early indications that the number of dengue cases may continue to rise. It is critical that all residents and stakeholders do their part to immediately remove stagnant water in their homes and surroundings on a regular basis, in order to deprive the *Aedes* mosquitoes of their breeding habitats.
